Profile

A team-spirited web developer with a full skillset in building front end applications. As effective collaborator and developer, I have serious passion for building web applications that are accessible, responsive and encourage high user interactions.

Skill Highlights

- Javascript, React, jQuery
- Working with RESTful APIs, and Firebase
- Project scope management

- HTML5, CSS3, Sass, responsive design
- Website accessibility requirements
- Paired programming & team-based development

Education

WEB DEVELOPMENT IMMERSIVE CERTIFICATE Spring 2020 | Juno College of Technology

WEB DEVELOPMENT COURSE Winter 2020 | Juno College of Technology

MASTER OF FINANCE   Summer 2017 | Wilfrid Laurier University

Projects

SIMULATED VENDING MACHINE APP (VIEW LIVE) - JQUERY | SASS | HTML5 | CSS3
- A simulated vending machine built with jQuery for users to select food or drinks and then insert coins to trigger a shopping summary printed to the page

USER-REVIEWS APP (VIEW LIVE) - REACT | FIREBASE | HTML5 | CSS3
- A fully responsive app built with React to publish user-reviews of selected restaurants
- Use firebase to allow users to save their reviews and list those reviews on the page

Working Experience

RISK RATING SPECIALIST | TD BUSINESS BANKING

- Effectively communicated and advised over 50 banking clients weekly on credit risk and financial solutions for organizations across diverse industries

- Collaborated with BRR team as well as supported management and senior analysts to identify risk tolerance of financial offerings to clients

- Applied requested adjustments to financial statements and created a revised set of financial
